APARNA T

Full-Stack Software Engineer | React · Next.js · Node.js · Nest.js · TypeScript

Bengaluru, India | +91-7736982547 | aparnatech.codes@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable, secure web applications using React.js, Next.js, Node.js, Nest.js, TypeScript, MongoDB and PostgreSQL. Strong in REST API development, responsive UI design, payment integrations and cloud deployments on AWS and GCP. Delivered end-to-end features across health-tech and edu-tech platforms. Collaborative, ownership-driven, and focused on clean, maintainable code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Dart, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Redux Toolkit, Angular, Tailwind CSS, Bootstrap, Reactstrap

Backend: Node.js, Express.js, Nest.js, REST APIs, Socket.IO, Server-Sent Events (SSE)

Databases: PostgreSQL, MySQL, MongoDB, Firebase Storage

Cloud & DevOps: AWS (EC2, S3), GCP (VM Instance, Storage Buckets), Docker, Cloudinary, CI/CD

Integrations: Stripe, Razorpay, Cashfree, Google OAuth 2.0, Multer, Sharp

Tools & Practices: Git, GitHub, GitLab, Bitbucket, Agile/Scrum, Data Structures & Algorithms, Clean Architecture

WORK EXPERIENCE

Software Engineer | AppZoy Technologies Pvt. Ltd. *Dec 2024 – Present*

- Build and maintain full-stack features across UI and API layers using React.js, Next.js, Node.js, Nest.js, Express.js, MongoDB and PostgreSQL in a team of 8+ engineers.
- Develop and integrate RESTful APIs and design database schemas in MongoDB (NoSQL) and PostgreSQL (SQL) to support scalable, data-driven features.
- Create secure, responsive UI screens with React, HTML5, CSS3, Tailwind CSS and Reactstrap/Bootstrap, ensuring consistent behaviour across devices and all major browsers.
- Contributed to API performance improvements that reduced response times for key endpoints.
- Delivered end-to-end features for the SVAIM health-centre platform, deployed and scaled on GCP.
- Work closely with backend and QA teams in Agile sprints for smooth releases and timely bug resolution; use Git, Docker and Agile workflows to maintain code quality and streamline deployments.

Junior Software Developer | Eduvy Technologies Pvt. Ltd. *Jun 2024 – Dec 2024*

- Independently built 2 backend services and 1 frontend from scratch using Node.js, Express.js, Angular and MongoDB, owning the full development lifecycle of each.
- Designed and implemented RESTful APIs for 2 core backend services, enabling real-time data flow and seamless integration with the frontend.
- Developed the Eduvy college admission platform and its APIs, hosted on AWS.
- Collaborated with team and QA in bi-weekly Agile sprints to deliver on schedule and reduce post-release bugs; joined requirement-gathering sessions and translated business needs into technical deliverables.

PROJECTS

SVAIM – Health Centre Software Solution | React.js, Node.js, Express.js, MongoDB, GCP

- Comprehensive health-centre platform for quick diagnostic report management (MRI, CT, X-ray, lab) used by radiologists, doctors, technicians and other staff.
- Implemented Server-Sent Events (SSE) for real-time status updates and instant notifications across patient workflows.
- Engineered end-to-end patient check-in via QR code and a wallet system for secure, seamless payments.
- Enhanced scalability and performance on GCP (VM instances, storage buckets) to support concurrent users and high-frequency medical operations.

Eduvy – Education & College Admission Platform | Angular, Node.js, Express.js, MongoDB, AWS

- College admission platform that lets students search colleges, explore courses and apply online, streamlining the entire admission process.
- Developed college search, course exploration and multi-step online application workflows using Angular and RESTful APIs.
- Integrated backend APIs on AWS to support real-time data handling and a smooth multi-step application experience.

Elysian Book – Parlour Slot Booking App | React.js, TypeScript, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB

- Booking platform giving users and salon owners an intuitive appointment experience, built with Clean Architecture.
- Built a complete booking system with dynamic location-based search, appointment management, real-time chat (Socket.IO) and Stripe payment integration.
- Developed admin and salon dashboards with reports, analytics and coupon management to improve operational efficiency.

EDUCATION

B.Sc. Computer Science | Calicut University, Kerala | CGPA: 7.483 (74.83%) *2020 – 2023*
